Building Reports for the Insurance Claim Request & Processing Management Application

Application: Insurance Claim Request & Processing Management

1. Aim

To build a suite of reports using the nine Zoho Creator report types on the existing Claim_Request_Form, so that submitted insurance claims can be searched, tracked, mapped and analysed by the claims processing team, surveyors, branch managers and senior management.

2. Procedure

All reports use Claim_Request_Form as the source form. Each submitted claim appears as one record. The general steps are:

1. Open the existing application in Zoho Creator and select the Claim_Request_Form data source.
2. Create a report of the required type.
3. Configure columns, grouping, sorting, date fields, chart settings or summary calculations.
4. Save the report using its specified name.
5. Verify the configuration and the displayed records.

2.1 Report Configurations

Report Type	Report Name	Configuration
List View	`All_Claims_List`	Columns: Claimant Name, Policy Number, Claim Type, Claim Amount Requested, Claim Status. Sort by Date of Incident, descending.
Spreadsheet View	`Claims_Spreadsheet`	Inline-editable: Investigation Status, Surveyor Assigned, Settlement Status. Group by Claim Type.
Kanban View	`Claim_Status_Kanban`	Group by Status: Submitted, Under Investigation, Approved, Settled, Rejected. Cards show Claimant Name and Claim Type.
Calendar View	`Incident_Date_Calendar`	Date field Date_Of_Incident; each day shows the number of incidents.
Map View	`Claimant_Location_Map`	Location field Residential_Address (where geocoding is supported); pin colour by Claim Type.
Timeline View	`Claim_Activity_Timeline`	Date-time field Claim_Submitted_On; group by week; cumulative claims if supported.
Pivot Table	`ClaimType_By_ ClaimantType_Pivot`	Rows Claim_Type; columns Claimant_Type; values count of claims.
Chart View	`Claim_Amount_ Analysis_Chart`	Category Claim_Type; value Claim_Amount_Requested (where supported). Chart type: suggested bar chart.
Summary View	`Claim_Management_Summary`	Claim counts and amounts using available fields and supported aggregations.

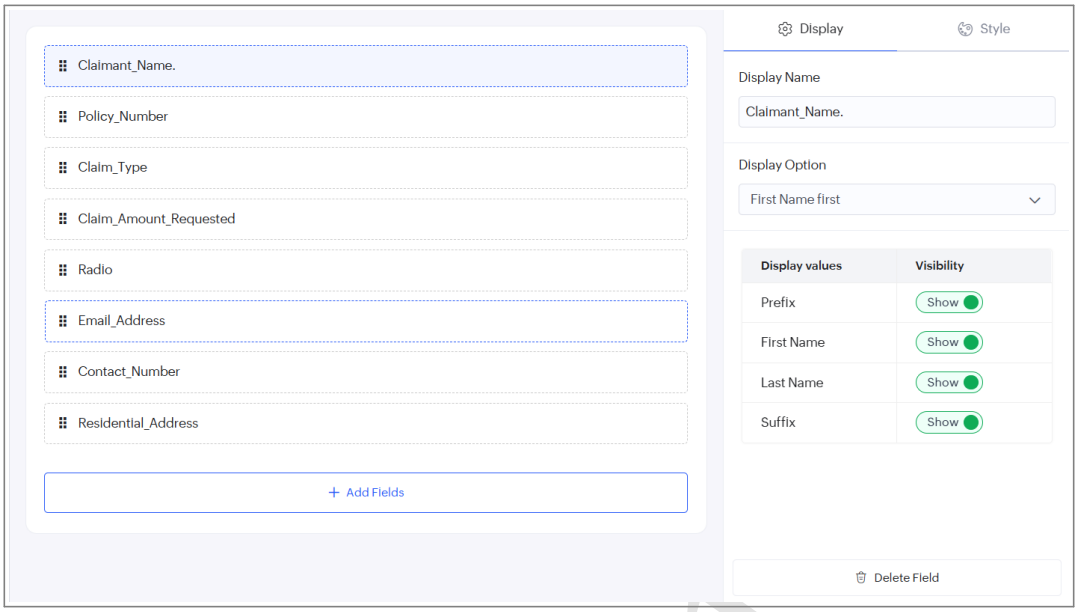

3. Output

List View — All_Claims_List

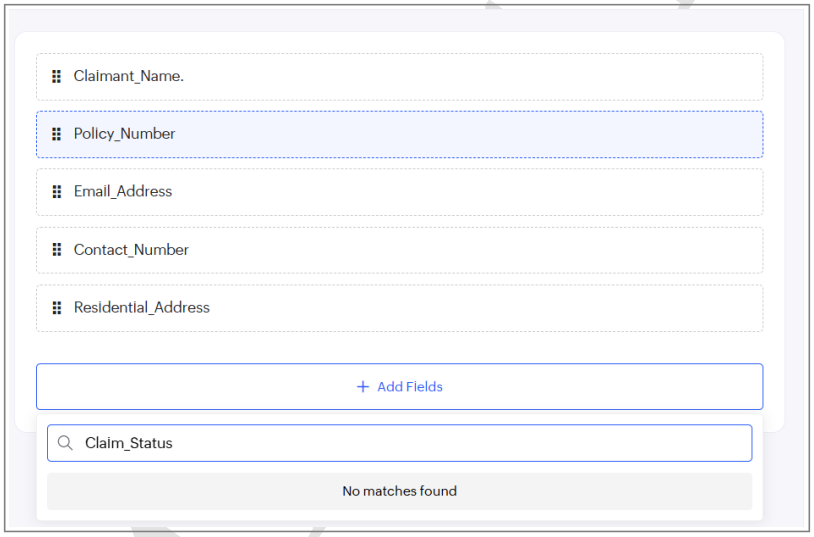

All_Claims_List report open in the Zoho Creator report designer.

4011 14

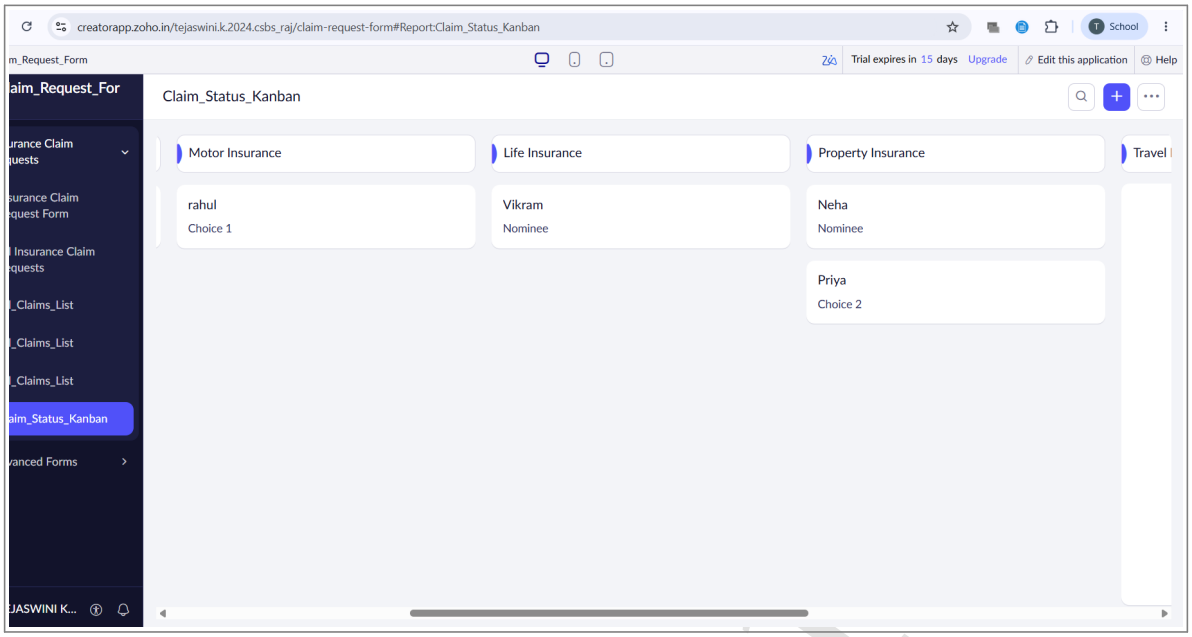

Configure Fields panel showing the fields selected for All_Claims_List.

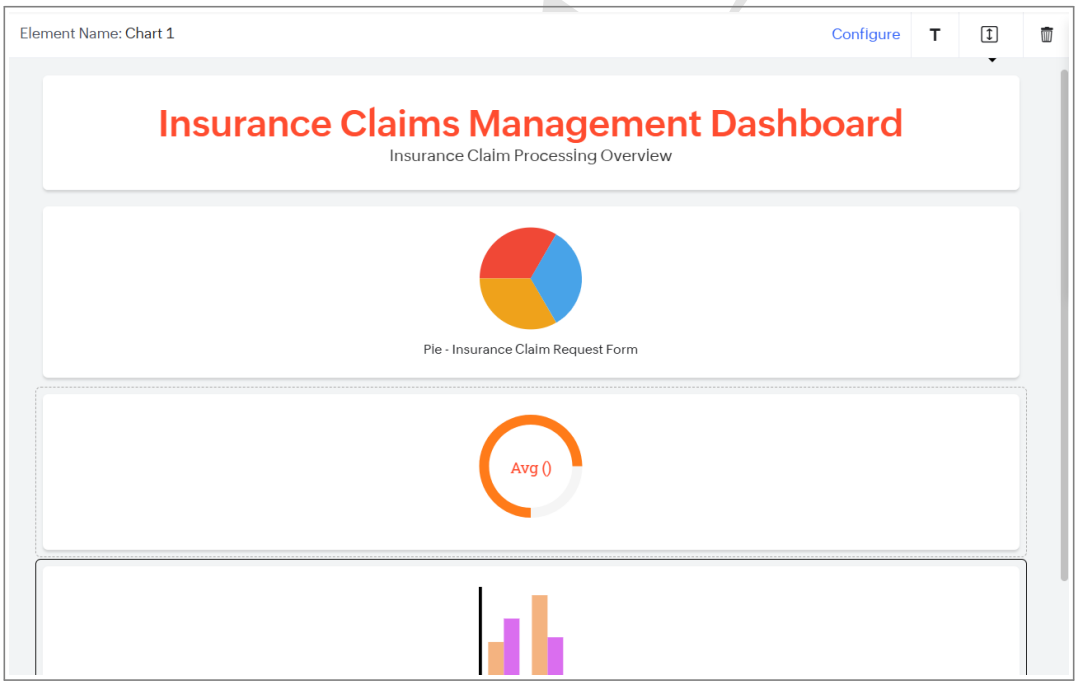

Searching Add Fields for "Claim_Status" returned "No matches found", so the status column is yet to be added.

Kanban View — Claim_Status_Kanban

Claim_Status_Kanban — claim cards grouped in columns (currently showing claim types; to be regrouped by status).

Dashboard Page

Insurance Claims Management Dashboard page with a pie chart, gauge and bar chart (still being configured).

Screenshots for Claims_Spreadsheet, Incident_Date_Calendar, Claimant_Location_Map, Claim_Activity_Timeline, ClaimType_By_ClaimantType_Pivot, Claim_Amount_Analysis_Chart and Claim_Management_Summary: [Insert Screenshot].

4. Result

The List View and Kanban View reports were created in Zoho Creator on Claim_Request_Form, and a dashboard page with charts was started. The Claim_Status field was not found in the form, so the

status column and status-based Kanban grouping remain to be completed. The other reports will be added and verified with real records.
